## IPTV Client License – GMVCLN100

### IPTV General Features

#### Customizable Channel Lists

With WISlon IPTV it's very easy to find a channel and channel transition time is below 2 seconds. Channel logo and country flag can be placed next to each TV channel. TV channels can be sorted between each other.

This way the TV channels can be categorized under different menus such as news, sport, entertainment, radio etc., enabling the user to find the desired channel and content. As long as the capacity of the IPTV headend is increased, there is no limitation on the number of channels.

#### Digital TV Signal Quality

Digital TV broadcast distributed to the rooms, is at least of DVD quality. All the noise is eliminated due to the digital infrastructure. The system also supports receiving of channels in 720p, 1080i, 1080p HD formats.

#### Easy User Interface

The user interface on the TV screen is very intuitive and easy to use. The simple and elegant design enables even a first time user to navigate without much effort. TV channels specified by the guest are sorted according to his/her nationality and therefore desired channels appear in the 1st places. A group of TV channels can be assigned to a specific group of guests, so only guests that belong to this group can watch these channels.

### Possibility of Charging TV Usage

It is possible to charge the guest for watching any TV channel or a group of TV channels. The management is free to specify the invoicing method and prices. There are two different pricing options with WISlon:

- ✓ Charging for an individual channel or charging for a group of channels. If no rate is specified service is free of charge for the users.
- ✓ With "Add a new pricing" many usage time intervals can be defined as requested. A different price can be set for each interval. The price list is displayed on the TV screen. When a time interval is purchased through the TV screen, the user will be able to watch the TV channel during that time interval.

### TV Group

TV channel groups can be defined for easy navigation on the user TV interface. By default, there are three pre-defined groups.

- ✓ National Channels: Channels from the country that the system is installed.
- ✓ Foreign Channels: Channels from other countries.
- ✓ Radio: Live radio stations

## Interactive Client License – GMVCLN110

### Interactive TV General Features

#### Welcome Message

After the guest is checked-in, when he first turns on the TV he will see a “welcome screen” in his own language. At this stage he will be able to modify the language selection if he wishes. After the language selection, if provided by the hotel introductory video will be played.

#### Message Feature

The hotel personnel is able to send e-mail messages to TVs. Messages could be sent either as urgent or normal. When an urgent message is sent, the guest will not be able to browse other menus until he reads the message.

#### Room Service

Guests will be able to order food & drinks from the TV menu. The menu will consist of both text and pictures.

#### Free Info Pages

Free access to weather information, flight info, currency exchange, stock exchange, newspapers is provided.

#### Corporate Identity

In the Interactive TV menu, the corporate identity of the hotel is reflected by using hotel's logo and picture.

WELCOME, Room 541  
DEAR HEINRICH HEIBEL

We hope you will enjoy your stay with at our hotel.

## Catch-up TV Server License – GMVSVR150

### Do not miss the moment, take it back!

There are television contents that glues people to their seats. Wondering about the new episode, the series whose finale is awaited, a big and exciting competition. However, it is often impossible to watch all broadcast content on the original day and time.

Therefore, catch-up TV feature has been developed for OTT service providers. Unlike the VoD feature, catch-up TV records and broadcasts TV series, contests, discussions and entertainment programs that were previously broadcast live on television channels. Thanks to this new feature that WISlon has brought to you, it is now possible to catch all retroactive TV streams over IPTV with the latest technology, catch-up TV.

You can filter channels by category by pressing left button!

## Integration to Third Party Systems

# Server License – GMVSVR200

micros®

### Property Management System (PMS) Integration!

WISIon IPTV software and systems provide rich content, system and customer management on TVs and mobile platforms at hotels and resorts, hospitals, campuses, headquarters and other businesses. Customer satisfaction is increased by integration of WISion with property management system (PMS) which are used at facilities hence enterprises move into profit.

PMS Integration in hotels and resorts allows guests to see their account status (View Billing), perform express check-out, order and receive invoices for services.

Integration to  
Third Party Systems  
is possible assuming  
necessary API  
is available.
